

OLUWASEYI ABAYOMI EMMANUEL

Full-Stack Web Developer | MERN Stack (React, Node.js, Express, MongoDB)

Ibadan, Oyo State, Nigeria • +234 706 484 0014 +234 816 670 9577 • oluwaseyifunmioluwadami@email.com •
github.com/oluwaseyifunmi52 • Open to Remote Work

PROFESSIONAL SUMMARY

Self-taught full-stack JavaScript developer with hands-on experience shipping and maintaining production MERN applications end-to-end — from database schema design and secure REST APIs through to deployed, multi-role React frontends. Currently building a six-project portfolio while completing a BSc in Computer Science (University of the People), and holds a Full-Stack Web Developer certificate from ClaspTek Coaching Limited. Brings over five years of field experience in electrical installation, solar PV systems, and industrial machine maintenance — translating into methodical fault diagnosis, calm handling of live production issues, and strong attention to detail. Seeking a remote or Ibadan-based junior/entry-level full-stack developer role.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript (basic working knowledge)
- **Frontend:** HTML5, CSS3, React, Vite, Tailwind CSS, responsive/mobile-first design
- **Backend:** Node.js, Express.js, REST API design, JWT authentication & refresh tokens, centralized error-handling middleware, rate limiting, security middleware, role-based access control
- **Databases:** MongoDB (Mongoose, schema design, indexing), PostgreSQL/MySQL (basics), CRUD, relational & document data modeling
- **Tools & Technologies:** Git, GitHub, VS Code, Postman, npm, Linux CLI, dotenv, Vercel, Render, Cloudinary, CI/CD basics, CORS configuration
- **Concepts:** MVC architecture, async/await & promises, component-based UI, API integration, deployment troubleshooting (DNS, environment variables, build pipelines)
- **Languages Spoken:** English (Fluent), Yoruba (Native)

FEATURED PROJECT

Royal Higher Life Schools Platform | Full-stack MERN application — production deployment

A real, in-use school management platform for a Nigerian primary school, built and deployed end-to-end (frontend on Vercel, backend on Render, MongoDB Atlas).

- Built multi-role access (student, teacher, parent, admin) with a reusable role-based authorization pattern and JWT/refresh-token authentication
- Modeled a Nigerian academic term/assessment structure, plus assignments, meetings, and a learning-resources library in MongoDB with Mongoose
- Implemented a public admission form with automatic account generation on approval, and gamification features to drive student engagement
- Diagnosed and resolved production incidents independently: CORS misconfigurations, middleware ordering bugs, ES module hoisting issues, and MongoDB Atlas DNS failures on live deployments
- Refactored the frontend theming system and resolved CSS cascade conflicts across a component library styled with Tailwind CSS <https://royal-higherlife-schools-v2-rqmd.vercel.app>

ADDITIONAL PROJECTS

Royal Higher Life Christian Ministries Website | React (Vite + React Router) — deployed

- Converted the ministry's static website into a React application, refactoring a monolithic CSS codebase into structured partials with a design token system <https://royal-higher-life-aq25.vercel.app>

Hospital Management System | MERN Stack — deployed

- Built and deployed a hospital management web application using the MERN stack, as part of a six-project full-stack portfolio roadmap <https://hospital-management-system-514x.vercel.app>

Online Voting Application | *MERN Stack — deployed*

- Built and debugged a live voting platform (backend on Render), fixing election-route gaps, data-model mismatches, and CORS errors

Sarah Beauty Store | *React E-commerce Frontend — deployed*

- Built a React storefront including a skin-type quiz with scoring logic and a consolidated responsive CSS system

Task Manager REST API / Blog API / URL Shortener Service | *Node.js, Express, MongoDB & PostgreSQL*

- Built three backend REST services: JWT-authenticated task management API with Mongoose relationships; role-based blogging API with a normalized PostgreSQL schema, pagination, and search; and a URL-shortener with click tracking and a stats endpoint — all following clean MVC structure

WORK EXPERIENCE

Freelance Full-Stack Web Developer | *Remote* | *2026 – Present*

- Communicate directly with clients to scope requirements, manage timelines, and deliver production-ready web applications
- Handle client feedback professionally and iterate on deliverables to ensure satisfaction

Customer Support Specialist | *Class 54 Educational Practice App (Remote)* | *2024 – 2025*

- Resolved 50+ customer and user inquiries weekly via email and messaging platforms, including basic technical troubleshooting
- Investigated and reproduced user-reported issues, escalating clear, well-documented bug reports to the technical team
- Identified recurring issues and improved response efficiency; developed strong attention to detail now applied to writing clean, documented code

Electrical Technician / Solar Installer • Machine Maintenance • Battery Assembly | *Adesina Electrical Contractor, Sweet Nutrition Ltd, Mutaab Technical Services — Ogun & Lagos States* | *2019 – 2022*

- Installed and maintained electrical systems and residential solar PV setups (panels, inverters, batteries, charge controllers); performed industrial machine maintenance and solar battery assembly across three roles
- Independently diagnosed and repaired electrical/mechanical faults under safety compliance standards — the same root-cause troubleshooting now applied to debugging code and deployment issues

EDUCATION

BSc, Computer Science | *University of the People (Online)* | *In Progress*

- Relevant coursework: Programming Fundamentals, Data Structures, Databases, Web Programming

National Diploma (ND), Electrical/Electronics Engineering | *Lagos State Polytechnic (LASPOTECH)* | *Completed*

CERTIFICATIONS & CONTINUOUS LEARNING

- Full-Stack Web Developer — Certificate of Completion, ClaspTek Coaching Limited (April 2026) — Front-End & Back-End Web Development: HTML5, CSS3, JavaScript (ES6+), React, Node.js, Express.js, MongoDB, Git & GitHub (Certificate No. CLASP251200150)
- Self-directed learning through freeCodeCamp, MDN Web Docs, and Node.js official documentation; ongoing GitHub practice building and deploying production MERN applications

ADDITIONAL STRENGTHS

- Strong, methodical debugger — comfortable tracing production issues across frontend, backend, and deployment infrastructure
- Clear communicator — able to explain technical issues to non-technical users and teammates, proven in a customer support role
- Reliable and calm under pressure; quick learner with a genuine passion for building complete, end-to-end web applications
