

OLUWASEYI ABAYOMI EMMANUEL

Full-Stack Web Developer | JavaScript Developer (React & Node.js)

Ibadan, Oyo State, Nigeria • +234 706 484 0014 • oluwaseyifunmioluwadami@email.com • Open to Remote Work

PROFESSIONAL SUMMARY

Aspiring full-stack web developer with hands-on experience building backend REST APIs (Node.js, Express, MongoDB, PostgreSQL) and foundational frontend skills in HTML, CSS, JavaScript, and React. Currently pursuing a BSc in Computer Science (University of the People) while working toward connecting frontend interfaces to backend services end-to-end. Brings a proven background in customer and technical support, sharpening attention to detail, communication, and calm handling of production issues. Seeking a junior or entry-level full-stack developer role, remote or Ibadan-based, to grow across the stack.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript (ES6+), React

Backend: Node.js, Express.js, REST API design, JWT authentication, middleware, error handling

Databases: MongoDB (Mongoose), PostgreSQL / MySQL (basics), schema design, CRUD

Tools & Platforms: Git, GitHub, VS Code, Postman, npm, Linux CLI, dotenv, Nodemon

Concepts: REST APIs, MVC architecture, Async/Await, Promises, component-based UI, Authentication & Authorization, deployment (Render / Railway)

Languages Spoken: English (Fluent) • Yoruba (Native)

BACKEND PROJECTS

Frontend integration for these projects is in progress as part of ongoing portfolio development.

Task Manager REST API

Node.js + Express + MongoDB — full CRUD REST API with authentication

- Designed and built RESTful endpoints (GET, POST, PUT, DELETE) for tasks and users following MVC architecture
- Implemented user registration and login with JWT authentication and bcrypt password hashing
- Modeled data with Mongoose schemas, including relationships between users and their tasks
- Tested endpoints thoroughly with Postman and handled errors with centralized middleware

Blog API

Express + PostgreSQL — REST API for a simple blogging platform

- Built endpoints for posts, comments, and users with role-based access (author vs. reader)
- Designed a normalized PostgreSQL schema and wrote parameterized SQL queries to prevent injection
- Added pagination, filtering, and search on the posts endpoint
- Deployed the API to Render and connected it to a managed PostgreSQL instance

URL Shortener Service

Node.js + Express + MongoDB — mini backend service

- Generated unique short codes, stored URL mappings, and handled redirects on the server
- Tracked click counts per short link and exposed a stats endpoint
- Practiced clean project structure: routes, controllers, services, and models

WORK EXPERIENCE

Freelance Full-Stack Web Developer | Freelance / Self-Employed (Remote)

2026 – Present

Client-facing freelance web development work

- Communicated directly with clients to understand their needs and deliver solutions
- Managed client expectations, timelines, and follow-up throughout each project
- Handled client feedback professionally and made revisions to ensure satisfaction

Customer Support Specialist | Class 54 Educational Practice App (Remote)

2024 – 2025

Customer service and technical support for an online educational technology platform

- Resolved 50+ customer and user inquiries weekly via email and messaging platforms, including basic technical troubleshooting on the app
- Investigated and reproduced user-reported issues, then escalated clear, well-documented bug reports to the technical team
- Identified recurring issues and reported them to the team, improving response efficiency and user experience
- Maintained accurate customer and interaction records, developing strong attention to detail — a skill directly applied to writing clean, well-documented code

EDUCATION

BSc, Computer Science | University of the People (Online)

In Progress

- Relevant coursework: Programming Fundamentals, Data Structures, Databases, Web Programming

CERTIFICATIONS & CONTINUOUS LEARNING

- Self-directed learning through freeCodeCamp (Back End Development and APIs), MDN Web Docs, and Node.js official docs
- Ongoing practice on GitHub — building backend services and React components to reinforce full-stack development
- Open to completing formal certifications in Full-Stack Web Development

ADDITIONAL STRENGTHS

- Strong debugger — patient and methodical when tracing issues across frontend and backend
- Clear communicator — able to explain technical issues to non-technical users and teammates (proven in support role)
- Reliable and calm under pressure — valuable when handling production incidents
- Quick learner with a genuine passion for building complete, end-to-end web applications
